2. What will you do tomorrow?.....

Fill the blank with the following words. (3 points)

- organ oxygen carries chest pumps plasma

The heart is a in humans and other, which through the of the . Blood provides fill the body with, and also assists in the removal of. The heart is located in the middle of the More than half of blood is..... This is a clear and yellow liquid. Itred and white cells.

Read the text and answer the questions. (4 points)

The Milky Way

We live in one of the arms of a large spiral galaxy called the Milky Way. The Sun and its planets (including Earth) lie in this quiet part of the galaxy, about half way out from the center. The Milky Way rotates once every 200 million years. It is made up of at least 100 billion stars, as well as dust and gas. It is so big that light takes 100 000 years to cross from one side to the other. The center of the Galaxy is very hard to see because clouds of gas and dust block our view. The Milky Way belongs to a cluster of at least 40 galaxies.

They include two galaxies that can be seen with the naked eye from countries.

1. Earth is in the milky way. a. True b. False

2. The Milky Way belongs to a cluster of at least 14 galaxies. a. True b. False

3. light takes 100 000 years
a. to cross from one side to the other. b. to cross from the planets
c. to cross from the Earth d. to cross from the sun

4. The Milky Way rotates once.....
a. every 20 million years. b. every 2000 million years.
c. every 100 million years. d. every 200 million years.

5. can we see all galaxies with naked eyes?
.....

6. how many stars are in milky way?
.....
