LESSON 1

Saving Nature

Part I
Reading Comprehension

Simple ways to protect wildlife

One easy way to protect wildlife is learning about the endangered animals that live around you. Teach your friends and family about the wonderful birds, fish and plants that live near your home. In this way, they are going to be more careful about nature. You can also visit a national wildlife museum or park. These places give good information about how to protect endangered animals and their homes. You can do voluntary work in these places to help animals and their babies.

Another thing you can do is protecting the natural home of the endangered animals. When you keep nature clean and safe, the animals will live longer. Protecting the trees of forests is also helpful. If you live in a village, you need to be very careful about the hunters who come to your village to hurt animals. Whenever you see these people, you need to call the police. These are simple things, but they will help nature a lot.

A. True or False

- 1) Learning about endangered animals is not important. T F **FALSE**
- 2) You can do voluntary work in wildlife parks. T F **TRUE**
- 3) Keeping nature clean hurts animals. T F **FALSE**

B. Answer the following questions.

1) Is it good to give information to our family about wildlife?

Yes, it is

2) Why is protecting the trees helpful for endangered animals?

Because the trees are the natural home of these animal.

3) Do you know another simple way to protect wildlife?

.....

LESSON 2

Wonders of Creation

Part I

Reading Comprehension

Microbes

Microbes are really wonderful. They are everywhere! They live all around you, on you and inside you! Microbes are very small, so you can't see them. But don't worry. Some microbes make you sick but most others keep you healthy and even help you to fight disease.

There are so many different types of microbes. We still don't really know how many there are, but we know that microbes do lots of different things. Bacteria and viruses are two important types of microbes.

Bacteria are really important microbes. They are very small. They have only one cell. Bacteria can live in any area of the earth. They aren't all bad; in fact you couldn't live without some bacteria!

Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they cannot live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses – they usually attack your body and make you sick!

A. True or False

- 1) Microbe is an important type of bacteria. T F **False**
- 2) Viruses can live in any place in the world. T F **False**
- 3) Bacteria do not need to be inside a living cell to live. T F **True**

B. Answer the following questions.

Traveling the World

Part I Reading Comprehension

How to be a good traveler

Travel is about visiting new places and meeting new people. When visiting a destination, a traveler should take care of people, places and cultures. So, before any travel, we must pay attention to some points.

First, we must read as much as possible about the main tourist attractions we are going to visit. Searching the Internet is an easy way to know about them. Also, learning a few words and phrases of the local language can be very useful, especially when we meet new people there.

When we meet local people, we must not forget that we are guests! So, we must respect their way of living. When visiting historical and especially holy places, we must respect them, too.

When we visit natural places such as lakes, forests and deserts, we must protect the plants and wild animals. In this way, every travel can be a great experience for us.

A. True or False

1) Learning about other cultures is not important for a traveler.

T F FALSE

2) Reading is a good way to know about a tourist destination.
